

# GREENKON ENGINEERING

## Energy Efficiency Improvement Opportunity

We are delighted to share an important energy efficiency improvement opportunity for **Community Sports Clubs across Australia**.

A new Federal Government grant program is offering up to **\$100,000** to support energy efficiency upgrades and related improvements.

**Please use the link at the bottom of this document to access the full grant guidelines and a concise summary for your convenience.**

### Key Considerations

---

- There is no cost or risk to you; with a strong, timely application, this can be a genuine win-win.
- Our team has successfully supported more than 100 clients with similar grants, supporting local organisations from application through to implementation and reporting.
- The technical requirements and timing can be complex, but we have a strong track record of success with these types of grants.
- **It is critical that applications are submitted on the first day the portal opens on 1st of July 2026 .**
- Section 4 of the guidelines defines eligibility to apply.

## Next Steps

---

1. We would like to have a conversation to better understand your potential eligible energy efficiency upgrades.
2. We will set up an online or face to face consultation with **Alex Koncar**, Managing Director, **GreenKon Engineering**.
3. We will then prepare your Grant application, with all technical and administrative elements prepared in advance, ready for **1st of July 2026**.

**We look forward to hearing from you and assisting with next steps.**
